Milan Laser Hair Removal Donation Creates New Tech Lab at Nelson Mandela Elementary School

Omaha, NE. (May 31, 2022) — Milan Laser Hair Removal partnered with Nelson Mandela Elementary School to donate more than \$30,000 worth of new equipment to create a new technology lab for the school. The growing laser hair removal company no longer needed the new, unboxed computers and wanted to give them to an under-resourced school. Nelson Mandela Elementary was selected to receive the donation because it's where the equipment would have the largest impact in the community as the school did not previously have a computer lab.

Milan Laser will surprise the students attending the Nelson Mandela Elementary summer semester during a ceremony on June 2, 2022, from 4-5 p.m. with the new computer lab. The event will be open to the media, and we hope you'll join us to celebrate the dedication of the new lab.

"We are honored to be able to help supply students with computers for a tech lab," said Dr. Shikhar Saxena, Co-founder and Chief Executive Officer of Milan Laser Hair Removal. "All students should have access to technology that supports their ongoing academic pursuits."

[Nelson Mandela Elementary](#) is a private, tuition-free elementary school located in North Omaha. Its mission is to provide a quality education that demonstrates all students can learn and develop academically, socially, and physically. The school is committed to maximizing the educational success of all scholars and bridging learning and achievement gaps.

“We want our scholars to be prepared in the 21st century with the proper knowledge of the ever-changing digital world,” said Genevive Core, Principal of Nelson Mandela Elementary School. “This computer lab will allow every scholar to learn and experience all the things necessary to be a well-rounded citizen in our world.”

For more information about the donation or the ceremony, please contact Bettia Williamson at Bettia.Williamson@MilanLaser.com.
